

Prowers County Address or Change of Address Request Form

To better assure efficient delivery of service and the timely response by emergency service providers, physical addresses are required for all home sites and businesses in Prowers County. The county uses a nationally recognized Uniform Measurement System referred to as the Century System.

Address numbers are based on fractions of a mile, which indicate the distance along a named County Road or State Highway traveled to reach a given driveway. While accuracy is important, an odometer reading to the nearest tenth of a mile from the origin of the road to the start of the driveway is usually sufficient to allow the assignment of an address. It is also important that physical addresses be properly sequenced along a road and as such a verification of addresses that already exist in proximity to the subject property is required.

Land Owner _____ Phone No. _____
